## WORK EXPERIENCE

### Software Developer OMX DIGITAL Pvt Ltd.

04/2025 - Present

Siliguri, West Bengal

Responsibilities and Duties & Achievements

- **Developed and maintained scalable web applications** using **PHP, Laravel, and React.js**, improving system reliability and user experience.
- **Customised WordPress themes, plugins, and WooCommerce solutions** to deliver tailored business functionality for diverse clients.
- **Designed and integrated RESTful APIs**, ensuring seamless communication between front-end and back-end systems.
- **Diagnosed and resolved full-stack technical issues** promptly, minimizing downtime and improving user satisfaction.

### Backend Developer Apexenial Labs

12/2023 - 06/2024

Remote

Siliguri

Achievements/Tasks

- I have worked with various technologies including **WordPress, PHP, Laravel 10, Bootstrap v5, Canva**, and **CRM**.
- Optimized backend architectures for a **Hotel Management System, CRM, and Academic Operations Platform**—resulting in a 30% reduction in API response times and a 40% improvement in scalability.
- Integrated various APIs into existing systems, enhancing functionality and user experience, resulting in a 60% increase in user engagement.

### Salesforce Developer Virtual Internship Smart Internz

08/2023 - 10/2023

Remote

Salesforce Developer

- In this internship, I have gained hands-on experience with **Salesforce fundamentals**, including **Organizational Setup, Relationship & Process Automation, Flows, Security, Apex development**, and **Testing & Debugging**—enhancing workflow automation and system efficiency.
- Explored the Salesforce platform by completing 50+ Trailhead modules and building a custom application to manage tutoring clients, developing a strong understanding of core functionalities and data structures.

## PROJECTS

### Email-AI-Assistant (01/2025 - Present) [🔗](#)

- **Tech Stack: Java, Spring Boot, Maven, Vite+React, Material UI, HTML, CSS, Gemini 1.5 Flash API**.
- Enhanced an **AI-powered email assistant** leveraging the **Spring Boot** framework for the backend, optimizing automation in email **association, filtering**, and response management.
- Designed and created the front end with **Vite React** and **Material UI**, providing a highly **responsive** and **efficient** interface to enhance streamlined email management and user experience.

### Academic Operations Platform (04/2024 - Present) [🔗](#)

- I have built Software using **HTML, CSS, Bootstrap 5, Laravel 10**, and **MySQL**.
- The software features comprehensive functionalities, including **secure login authentication**, an **admin dashboard** for management, a **fee collection module**, a **communication system**, **student registration capabilities**, an export-to-Excel feature, a password recovery option via **SMTP mailing**, and additional advanced tools.
- **CRM access:** ID- **amkiy@school.com**, Password- **mrparichay**

### Banking Services Platform (06/2022 - 03/2023)

- As part of a group project, we developed a comprehensive banking management system utilizing **Java, Swing, MySQL**, and **AWT** for the front end and **HTML, CSS**, and **Bootstrap** for the back end. This ensured a robust and user-friendly interface.
- This is a full-fledged application that banks can use to handle their customers efficiently and easily.
- The system enables users to perform key banking tasks such as opening **new accounts**, making **cash deposits**, **processing transactions**, **withdrawing funds**, and more, ensuring seamless and efficient financial operations.

## ACHIEVEMENTS & CERTIFICATES

### Coding Problems Solved

Solved 1000+ Problems across different platforms. [Leetcode](#), [Geeksforgeeks](#), [Hackerrank](#), [Codechef](#), and more.

### Amazon DynamoDB Learning Plan(includes Labs) (09/2024 - Present)

Illustrate design patterns and solutions, while optional labs using the **AWS SDK** for **Python, AWS CLI**, and **AWS Management Console** reinforce key concepts.

### Project Development Using JAVA (04/2023) [🔗](#)

I have knowledge of **Object-Oriented Programming Concepts - Abstraction, Inheritance, Encapsulation** and **Polymorphism** and more skills.
